

Multiple Objects Selector

3.19,7.20/RC4/PROD

This selector allows selection of multiple objects. The selected objects are collected in the column to the right. Details can be viewed by clicking object: a details panel appears on top

Selected objects

Column filters

Details panel

The image displays two screenshots of the 'Business Partner Selector' dialog box, illustrating its functionality. The dialog is titled 'Business Partner Selector' and features a table of business partners with columns for 'Name' and 'Type'. The 'Type' column is filtered to show only 'Employee' records. The 'Selected' column on the right lists the selected objects: 'Bernie van der Velden' and 'Bernie Barnstack'. A yellow tooltip indicates that clicking an object will view its details and clicking the 'X' will remove it. The details panel for 'Bernie Barnstack' is shown on the right, displaying his role as 'Sales Representative at REY', Tax ID 'Y1493458234-01', and booking information for 'Bookings YTD' (12987,98) and 'Bookings last Quarter' (5010,78). The details panel also includes sections for 'More relevant information' which currently show 'xxxx'.

Name	Type
